The human body is designed to be healthy. The primary system in the body, which coordinates health and function, is the nervous system. Your nervous system is surrounded and protected by the bones of the spine, called vertebrae. Many of the common health challenges that adults experience have their origins during the developmental years, starting at birth. Layers of damage to the spine and nervous system occur as a result of various traumas, toxins, and emotional stress. The result may be misalignment to the spinal column and damage to the nervous system – a condition called Vertebral Subluxation. Please answer the following questions to give us a better understanding about your child's state of wellness and factors which may be contributing to vertebral subluxation and impeding your child's ability to heal.

What signals has your child's body been communicating?

What is your primary goal for your child at our clinic?

____

Our goal is to provide a detailed assessment of your child's current health status and provide you with the resources for a highly engaged and healthy child whose body is functioning at its absolute peak potential while they grow. Essential to this healthy growth is a properly functioning nervous system that is able to function free from interference called subluxation.

TERMS OF ACCEPTANCE

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working towards the same objective. Chiropractic has only one goal. It is important that each patient understand both the objective and the method that will be used to attain this goal. This will prevent any confusion or disappointment.

ADJUSTMENT: An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxations. Our chiropractic method of correction is by specific adjustments to the spine.

HEALTH: A state of optimal physical, mental, and social well-being, not merely the absence of disease or infirmity.

VERTEBRAL SUBLUXATION: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxations. However, if during chiropractic spinal examination, we encounter non-chiropractic or unusual finding, we will advise you. If you desire advice, diagnosis, or treatment for those findings, we will recommend you seek the services of another health care provider.

Regardless of what the disease is called, we do not offer to treat it, nor do we offer advice regarding treatment prescribed by others. OUR ONLY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxations.

I, ______________________________, have read and fully understand the above statements.

All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction.

I therefore accept chiropractic care for my minor child under the above mentioned terms.

INFORMED CONSENT

Chiropractic Adjustments, Modalities, and Therapeutic Procedures

I have been advised that chiropractic care, like all forms of health care, holds certain risks. While the risk are most often very minimal, in rare cases, complications such as sprain/strain injuries, irritation of a disc condition, and although rare, minor fractures, and possible stroke, which occurs at a rate between one instance per one million to one per two million, have been associated with chiropractic adjustments.

Treatment objectives as well as the risks associated with chiropractic adjustments and, all other procedures provided at Mission Chiropractic and Wellness have been explained to me to my satisfaction and I have conveyed my understanding of both to the doctor. After careful consideration, I do hereby consent to treatment by any means, method, and or techniques, the doctor deems necessary to treat my condition at any time throughout the entire clinical course of my care.
